Polyester

Printing technology
Digital printing

Notes

Colors: Pantone | up to 7c
The document should be created exclusively in spot colors according to Pantone. For colors according to RGB, Lab or CMYK we need a Pantone reference value.
If colors other than Pantone are used, color deviations may occur. A maximum of 7 colors can be used for this product. Color accuracy can only be achieved by a proof agreed in advance.

Fonts & Elements: embedded/ paved
All fonts and elements must be embedded in the print file.
Fonts can also be converted into paths directly.

File format: PDF/X-4
We need the print data in PDF/X-4 format. The correct output condition is the color profile ISOcoated v2 (eci).

Resolution: 300 ppi
In general we prefer vector-based files for this product. For pixel-based data, the resolution should be at least 300 ppi.
