Data

Size

100 x 100 mm front
300 x 200 mm back

Material

Polyester

Printing technology

Screen printing (1c, 2c, 3c, 4c)

Notes

Colors: Pantone | 1c/2c/3c/4c

The document should be created exclusively in spot colors according to Pantone. For colors according to RGB, Lab or CMYK we need a Pantone reference value.

If other colors than Pantone are used, color deviations may occur. Depending on the product variation, the maximum number of colors used is 1c, 2c, 3c or 4c. Color accuracy can only be achieved by a proof agreed in advance.

Fonts & Elements: embedded/ paved

All fonts and elements must be embedded in the print file. Fonts can also be converted into paths directly.

File format: PDF/X-4

We need the print data in PDF/X-4 format. The correct output condition is the color profile ISOcoated v2 (eci).

Resolution: Vectors

For this product we only need vector-based data. Unfortunately no pixel data can be processed.
