Printing technology

Digital printing

Notes

Colors: Black (100% K)

The document should be created exclusively in the printing color black (100% K).

Fonts & Elements: embedded/ paved

All fonts and elements must be embedded in the print file. Fonts can also be converted into paths directly.

File format: PDF/X-4

We need the print data in PDF/X-4 format. The correct output condition is the color profile ISOcoated v2 (eci).

Resolution: 300 ppi

In general we prefer vector-based files for this product. For pixel-based data, the resolution should be at least 300 ppi.
